WAC 232-12-002 Fish and wildlife commission members' recusal requirements for commissioners with beneficial interests in certain commission decisions and transactions. (1) Commission members must comply with subsection (2) of this section when the following circumstances apply or it is reasonably foreseeable that they will apply:

(a) The member is beneficially interested, directly or indirectly, in a contract, sale, lease, purchase, or grant that may be made by, through, or under the supervision of the commission, in whole or in part; or

(b) The member accepts, directly or indirectly, any compensation, gratuity or reward from any other person beneficially interested in a contract, sale, lease, purchase, or grant that may be made by, through, or under the supervision of the commission, in whole or in part; or

(c) The member either owns a beneficial interest in, or is an officer, agent, employee or member of, an entity which is engaged in a transaction involving the commission.

(2) If required by subsection (1) of this section, the member must:

(a) Recuse himself or herself from discussions by the commission, regarding the specific contract, sale, lease, purchase, grant, or transaction; and

(b) Recuse himself or herself from any vote by the commission on the specific contract, sale, lease, purchase, grant, or transaction; and

(c) Refrain from attempting to influence any other member or employee in any discussion or vote regarding the specific contract, sale, lease, purchase, grant, or transaction.

(2007 Ed.)

(3) Definitions. The following definitions apply to this section:

(a) "Transaction involving the commission" means a proceeding, application, submission, request for a ruling or other determination, contract, claim, case, or other similar matter that the commission member in question believes, or has reason to believe:

(i) Is, or will be, the subject of commission action; or

(ii) Is one to which the commission is or will be a party; or

(iii) Is one in which the commission has a direct and substantial proprietary interest.

(b) "Transaction involving the commission" does not include the following: preparation, consideration, or enactment of legislation, including appropriation of moneys in a budget, or the performance of legislative duties by a commission member; or a claim, case, lawsuit, or similar matter if the commission member did not participate in the underlying transaction involving the commission that is the basis for the claim, case, or lawsuit. Rule making is not a transaction involving the commission.

(c) "Commission action" means any action on the part of the commission, including, but not limited to:

(i) A decision, determination, finding, ruling, or order; and

(ii) A grant, payment, award, license, contract, transaction, sanction, or approval, or the denial thereof, or failure to act with respect to a decision, determination, finding, ruling, or order.

(4) Under subsection (1)(b), "any other person" has a beneficial interest in a contract, sale, lease, purchase, or grant when the other person bids or otherwise seeks to be awarded the contract, sale, lease, purchase, or grant.

(5) The prohibitions contained in subsection (2) do not prohibit the member from using his or her general expertise to educate and provide general information on the subject area to other commission members.

(6) If recusal occurs pursuant to the State Ethics law, chapter 42.52 RCW, or rules adopted pursuant to the State Ethics law, the commission member must disclose to the public the reasons for his or her recusal from any commission action whenever recusal occurs. The commission staff must record each such recusal and basis for the recusal.

EXAMPLES:

EXAMPLE ONE: The commission is composed of individuals who often are employed in the private sector. The governor appoints members of the commission. In making these appointments, the governor is required to seek to maintain a balance reflecting all aspects of fish and wildlife. Commission members are appointed because they have general knowledge of the habit and distribution of fish and wildlife and are often recommended by interest groups, such as sport fishers, commercial fishers, hunters, private landowners, and environmentalists. A commission member is employed by a company that provides contract facilitation services. The commission is in the process of selecting a contractor to conduct a series of public meetings on fishing in Washington. The company which employs the member of the commission has bid for the contract. The commission member may use his or her general expertise to educate commissioners about

(2007 Ed.)

desirable public meeting design elements for a successful public involvement project like the one the commission wants to conduct. The commission member is prohibited from participating in the commission discussion and analysis establishing criteria for selecting a contractor and is prohibited from participating in the commission vote to select a contractor (see WAC 232-12-002 (1)(c)). The commission member would publicly announce his or her recusal and the reasons for it, and the commission staff would record this information as part of the public record.

EXAMPLE TWO: The commission contracts with King Software (hypothetical company) to provide computer systems for tracking recreational license purchases. King Software's contract with the commission is almost expired, and the commission must seek bids from software companies for the next contract period. The commission issues a request for bids to various software companies who offer suitable software, including Fishsoft, Inc. (hypothetical company). Approximately nine months ago, one commission member worked for Fishsoft, Inc. and received compensation from that company. The commission member subsequently left Fishsoft, Inc. The commission member is not required to recuse himself or herself from selecting a contractor for the commission's computer license system. Fishsoft, Inc. did not have a beneficial interest in the commission's contract until it bid on the contract. Therefore, Fishsoft, Inc. was not a person beneficially interested in the contract when the commission member received the compensation (see WAC 232-12-002(4)). However, if the commission member received compensation from Fishsoft, Inc. after it bid on the contract, the commission member would be required to disclose the fact that he or she received the compensation from a bidder and recuse himself or herself from the commission's specific discussion and the vote awarding the contract (see WAC 232-12-002 (1)(b)). The commission staff would record this information into the public record. Again, the commission member could participate in discussions using his or her general expertise to educate and provide general information on the subject area to the other commission members.

WAC 232-12-016 Nonnative aquatic species. The following provisions apply to nonnative aquatic species except nonnative species in ballast water, which are provided for in chapter 220-77 WAC. The definitions of invasive species, prohibited aquatic animal species, regulated aquatic animal species, unregulated aquatic animal species, unlisted aquatic animal species and aquatic plant species as used in this section are the same as in RCW 77.08.010.

(1) Request for designation of unlisted aquatic animal species prior to release. Unlisted nonnative aquatic animal species must be reviewed and designated for classification by the commission as either regulated aquatic animal species or unregulated aquatic animal species prior to approval for release into state waters. A request for classification of an unlisted nonnative aquatic animal species shall be treated as a petition to amend WAC 220-12-090, and made on the OFM-01 form. Upon receipt of a petition, the department shall initially classify the species as a prohibited species until the review is complete. In addition to the OFM-01 form, a person requesting classification must provide the following information in order to present a complete request for designation for classification:

(a) Common and scientific name, reason for release, source of the animals proposed for release, and number of animals proposed for release.

(b) Native range of the species, assessment of potential positive and negative impacts of the release, citation of available scientific literature on release of the species in other nonnative locales, known potential for displacement of native species, hybridization with or predation upon native species, and disease or parasite transmission.

(c) Estimate of technical and economic feasibility of eradicating or controlling spread of the species once it is introduced into state waters.

(2) Provisions applying to prohibited aquatic animal species.

(a) Zebra mussels: It is unlawful to import live aquatic organisms, including plants, for release into state waters from any state or Canadian province east of the Continental Divide without each importation being accompanied by a zebra mussel-free certificate issued by the department and signed by the supplier of the aquatic organisms. The original receiver in the state of Washington of the shipment of aquatic organisms is required to retain the zebra mussel-free certificate for two years. (8) Escaped animals

(a) Escaped deleterious exotic wildlife, including Fallow deer (*Dama dama*), and Reindeer (all members of the Genus *Rangifer*, except *Rangifer tarandus caribou*) will be considered a public nuisance. The department or any peace officer may seize, capture, or destroy deleterious exotic wildlife that have escaped the possessor's control. (b) Escapes of deleterious exotic wildlife must be reported immediately to the department.

(c) The recapture or death of escaped deleterious exotic wildlife must be reported immediately to the department.

(9) Secure facility

(a) All deleterious exotic wildlife will be held in a secure facility. For the purpose of this rule, a secure facility is an enclosure so constructed as to prevent danger to the environment or wildlife of the state, including escape of deleterious exotic wildlife specimens or ingress of resident wildlife ungulates (hoofed animals). The adequacy of the facility shall be determined by the director or agents of the director.

(b) For deleterious exotic wildlife listed in subsections (1)(d)(iv) and (1)(d)(v), the "secure facility" must comply with the fencing requirements in subsection (10) unless otherwise authorized by the director in writing.

(10) Fencing requirements

(a) Perimeter fences must be, at a minimum, eight feet above ground level for their entire length. The bottom six feet must be mesh of sufficient size to prevent resident wildlife ungulates (hoofed animals) from entering and deleterious exotic wildlife from escaping. Supplemental wire required to attain a height of eight feet may be smooth, barbed, or woven

wire (at least 12-1/2 gauge) with strands spaced not more than six inches apart.

(b) Perimeter fences constructed of high tensile wire must be supported by a post or stay at minimum intervals of eight feet.

(c) Perimeter fences must be at least 12-1/2 gauge woven wire, 14-1/2 gauge high-tensile woven wire, chain link, non-climbable woven fence, or other fence approved by the director.

(i) If the wire used is not a full eight feet in height, it must be overlapped one row and securely fastened at every other vertical row or woven together with cable.

(d) Electric fencing materials may be used on perimeter fences only as a supplement to conventional fencing materials.

(e) All gates in the perimeter fences must be self-closing, equipped with two locking devices, and installed only in locations that have been approved by the director. Double gates may be required at points in the perimeter fences subject to frequent vehicle traffic that is not related to activities involving the holding of deleterious exotic wildlife.

(f) Posts used in the perimeter fences must be:

(i) Wood (pressure treated), five-inch minimum diameter or an equivalent as approved by the director;

(ii) Spaced no more than twenty-four feet apart with stays or supports at eight foot intervals between the posts;

(iii) Extended at least eight feet above ground level;

(iv) Corners braced with wood or with an equivalent material as approved by the director.

(g) Fences must be maintained at all times to prevent deleterious exotic wildlife from escaping or resident wildlife ungulates (hoofed animals) from entering the enclosure. If such animals do pass through, under, or over the fence because of any topographic feature or other conditions, the person possessing deleterious exotic wildlife must immediately supplement the fence to prevent continued passage.

(h) For any fence existing prior to February 13, 1993, a person may petition the director in writing for a variance from the above fencing requirements. Any such petition must be filed no later than May 31, 1993 and must identify all aspects in which the existing fence does not meet the fencing requirements contained herein. On approval of the director, such person may maintain such existing fence with normal repair. However, any extension or relocation of existing fence must meet the fencing requirements contained herein.

(11) Marking requirements

(a) All live specimens of deleterious exotic wildlife except those listed in subsections (1)(a) and (1)(b), shall be permanently and individually identified by methods approved by the director,

(b) Identification assigned to an individual animal may not be transferred to any other animal.

(c) All specimens of deleterious exotic wildlife identified in subsections (1)(d)(iv) and (1)(d)(v) must be individually identified by the methods specified below.

(i) All live specimens of such deleterious exotic wildlife shall be marked with USDA Official ear tags or with ear tags supplied or approved by the department. Tags shall be applied in sequential order, and

(ii) All live specimens of such deleterious exotic wildlife shall be marked with a tattoo with an identifying number that

has been recorded with the director. The tattoo must be placed on the left ear of the animal.

(d) All lawful progeny of deleterious exotic wildlife must be tagged and tattooed by December 31 of the year of birth or upon leaving the holding facility, whichever is earlier.

(e) Where allowed, if an animal is sold or transferred within the state, the tag and tattoo must accompany the animal. The new owner or possessor shall not renumber the animal.

(f) Where allowed, live specimens of deleterious exotic wildlife shall be marked prior to importation.

(g) No unmarked deleterious exotic wildlife may be sold or otherwise transferred from the holding facility.

(12) Testing of specimens

(a) Where allowed, prior to entry into the state of Washington, a person importing any member of the Genus *Cervus* which is identified in subsection (1)(v) herein must submit records of genetic tests, conducted by a professionally recognized laboratory to identify red deer genetic influence (genetic material from any member of any subspecies, race, or species of the elk-red deer-wapiti complex *Cervus elaphus* not indigenous to the state of Washington). Such testing shall be at the possessor's expense. Animals which are deemed by department of wildlife biologists upon examination to exhibit either: Behavioral (vocalization), morphological (size, rump patch, color) or biochemical indications of such influence (hemoglobin, superoxide dismutase, transferrin and post-transferrin, or others to be developed) may not be imported.

(b) The director may require a person currently possessing any member of the Genus *Cervus* which are identified in subsection (1)(v) herein to submit records of genetic tests, conducted by a professionally recognized laboratory to identify red deer genetic influence (genetic material from any member of any subspecies, race, or species of the elk-red deer-wapiti complex *Cervus elaphus* not indigenous to the state of Washington), for each individual cervid to the department. Such testing shall be at the possessor's expense. The director may require that any animal identified a red deer or having nonindigenous genetic influence be destroyed, removed from the state, or neutered.

(c) The director may require that all specimens of deleterious exotic wildlife lawfully in captivity be tested for brucellosis (*brucella abortus*), tuberculosis (*mycobacterium bovis* and *mycobacterium tuberculosis*), meningeal worm (*Paralostrongylus tenuis*), and muscle worm (*Elaphostrongylus cervis*) in accordance with the procedures specified in department of agriculture WAC 16-54-035 as now or hereafter amended and/or for other disease or parasites determined to pose a risk to wildlife. The results of such tests shall be filed with the director as required.

(13) Reporting

(a) A person holding deleterious exotic wildlife in captivity shall submit a completed report no later than March 30, 1993 and then no later than January 31 of each year, or as otherwise required by the director, on a form provided by the department.

(b) Persons possessing deleterious exotic wildlife must notify the director within ten days of any change of such persons' address and/or location of the holding facility.

(14) Inspection

(a) All holding facilities for deleterious exotic wildlife located in the state are subject to inspection for compliance with the provisions of this section.

(b) Such inspections may take place without warrant or prior notice but shall be conducted at reasonable times and locations.

(15) Notification and disposition of diseased animals.

(a) Any person who has reason to believe that deleterious exotic wildlife being held pursuant to this rule have or have been exposed to a dangerous or communicable disease or parasite shall notify the department immediately.

(b) Upon having reason to believe that deleterious exotic wildlife held pursuant to this rule have been exposed to or contracted a dangerous or contagious disease or parasite, the director may order inspection of such animals by a licensed, accredited veterinarian or inspection agent. Inspection shall be at the expense of the possessor.

(c) The director shall determine when destruction of animals, quarantine, or disinfection is required at any facility holding deleterious exotic wildlife pursuant to this rule. If the director determines that destruction, quarantine, or disinfection is required, a written order shall be issued to the possessor describing the procedure to be followed and the time period for carrying out such actions. Such activities shall be at the expense of the possessor.

(16) Quarantine area

(a) Any facility holding deleterious exotic wildlife must have an approved quarantine facility within its exterior boundary or submit an action plan to the director that guarantees access to an approved quarantine facility within the state of Washington.

(i) An approved quarantine facility is one that meets criteria set by the Washington state department of agriculture.

(ii) The quarantine area must meet the tests of isolation, separate feed and water, escape security, and allowances for the humane holding and care of its occupants for extended periods of time.

(b) Should the imposition of a quarantine become necessary, the possessor must provide an on-site quarantine facility or make arrangements at such possessor's expense to transport the animals to the approved quarantine facility named in the quarantine action plan.

(17) Seizure

(a) The department of wildlife may seize any unlawfully possessed deleterious exotic wildlife.

(b) The cost of any seizure and/or holding of deleterious exotic wildlife may be charged to the possessor of such animals.

(h) It is unlawful to hunt wildlife with any bow or crossbow equipped with a scope. Except hunters with disabilities who meet the definition of being visually impaired in WAC 232-12-828 may receive a special use permit that would allow the use of scopes or other visual aids. An archery special use permit application must be signed by a physician stating that the person's disability is permanent and the person has a loss of use of one or both upper extremities, has a significant limitation in the use of an upper extremity, or has a permanent physical limitation, which loss or limitation substantially impairs the ability to safely hold, grasp or shoot a long bow, recurve bow or compound bow. The loss or limitation may be the result of, but not limited to, amputation, paralysis, diagnosed disease, or birth defect. The approved archery special use permit must be in the physical possession of the person while using adaptive archery equipment as described in subsection (1)(d) of this section to hunt game birds or game animals.

Information describing types of adaptive equipment will be provided to physicians for their assessment of the applicant's ability to utilize adaptive archery equipment. Muscle weakness, impaired range of motion, or unilateral hand weakness disability, of both hands or both arms or both sides of the upper extremity, may result in an inability to use adaptive archery equipment. Standard tests approved by the American Medical Association may be conducted to assess a person's abilities.

WAC 232-12-073 Advanced hunter education. (1) In order to provide for additional hunting opportunity, on species, in areas, or at times when a higher proficiency and demonstrated skill level is needed for resource protection or public safety, the department establishes the advanced hunter education program. Persons who successfully pass the master hunter level of advanced hunter education are entitled to exercise the privileges of participation in special hunts restricted to master hunters. It is unlawful for any person to participate in a hunt restricted to master hunters if such person has not successfully passed the advanced hunter education master hunter course and such person possesses a valid master hunter identification card while participating in such a hunt, and it is unlawful to participate in a hunt restricted to master hunters if the person's master hunter status has been suspended or revoked. Violation of this subsection shall be enforced under RCW 77.15.400 (1)(c) for wild birds, RCW 77.15.410 (1)(b) for big game, and RCW 77.15.430 (1)(b) for wild animals other than big game.

(2) The advanced hunter education program has three levels, with the following proficiency requirements:

(a) Sharpshooter education: This program emphasizes marksmanship, with the goal of humanely killing game animals with the least number of shots. Successful graduates of the sharpshooter course must demonstrate above average shooting skills. The cost of applying for sharpshooter education is five dollars, and on successfully passing sharpshooter education each graduate will receive a certificate of completion and an advanced hunter education patch.

(b) Conservationist education: This program emphasizes habitat restoration and land use practices that maximize protection for wildlife. Successful graduates of the conservationist course will have spent a minimum of twelve hours participating in landowner-sportsman or wildlife-related projects. The cost of applying for conservationist education is five dollars, and on successfully passing conservationist education each graduate will receive a certificate of completion and an advanced hunter education patch.

(c) Master hunter education: In addition to both sharpshooter and conservationist education, the master hunter program emphasizes ethical behavior while hunting, a detailed knowledge of hunting statutes and rules, and specialized knowledge in how to hunt in damage control hunts that successfully remove problem animals while maximizing public safety. Both extensive home study and passing a rigorous test are prerequisites for achieving the master hunter graduate status. The cost of applying for master hunter education is twenty dollars, and on successfully passing master hunter education each graduate will be issued a certificate, an advanced hunter education patch, and a master hunter identification card. The master hunter identification card is valid for five consecutive years from the date of issuance. The card will be renewed for an additional five years if, during the period of validity, the master hunter education graduate completes twelve hours of conservationist education, consisting

of participating in landowner-sportsman or wildlife-related projects.

(3) Master hunters are held to the highest ethical standards while hunting, and are expected to respect all recreational and trapping laws. Accordingly, should a master hunter violate the trapping or recreational fishing or hunting laws, that person's master hunter status will be suspended or revoked as provided in this subsection. The grounds for suspension and revocation are proof by a preponderance of the evidence that the master hunter has committed a violation of law. A criminal conviction is a rebuttable presumption that the violation occurred. Any person who has master hunter status revoked or suspended under this subsection has the right to an administrative hearing to contest the agency action, and such hearing will be held pursuant to chapter 34.05 RCW, the Administrative Procedure Act.

(a) A two-year suspension of master hunter status will be imposed for any hunting or hunting related violation.

(b) A five-year suspension of master hunter status and a requirement to retake the master hunter course will be imposed for:

(i) Any conviction resulting in a suspension of recreational hunting or fishing privileges or in a trapping privilege suspension;

(ii) Any violations that involve two big game animals; or

(iii) Any violation that involves twice or more the daily limit of game or fish.

(c) A lifetime revocation of master hunter status will be imposed for:

(i) Any conviction resulting in a second suspension of hunting or fishing privileges or in a second trapping privilege suspension;

(ii) Any violation while recreational hunting or fishing privileges, trapping privileges, or master hunter status is suspended; or

(iii) Any violations that involve three or more big game animals.

(a) Fishing contest permits must be in the possession of the contest sponsor or official at the contest site.

(b) Contests are restricted to the species and waters approved on the permit. Only those species listed as a target of the contest may be retained by contest participants during bass or walleye contests where all contestants fish at the same time and place.

(c) Sponsors must report contest information requested by the department within 30 days after the contest has ended. Subsequent contest permits will not be issued for one year after the date of the contest for which the report was not returned if this requirement is not fulfilled.

(d) Contest participants may not restrict public access at boat launches.

(e) Contests for bass and walleye where participants expect to fish at the same time from boats on lakes or reservoirs will not last longer than three consecutive days and have the following limits per water:

ACRES	CONTESTS PER DAY	BOATS PER CONTEST DAY
Less than 300	1	15
301 - 3,000	1	35
3,001 - 6,000	2	75
6,001 - 10,000	2	120
More than 10,000	3	250

* No more than four weekend days per month nor more than two weekends per month may be scheduled on any water when contestants fish at the same time, and are allowed to fish from boats.

(f) It is unlawful for the fishing contest permittee or any of the contest participants to fail to comply with the conditions of the fishing contest permit, or of general fishing rules not specifically exempted by this permit. Failure of the permittee or any of the contestants to comply with all provisions of the contest permit or of other fishing regulations during a contest may lead to revocation of the permit and result in denial of fishing contest permits to the permittee and related organizations or individuals sponsoring contests for two years.

(6) Special regulations, bass and walleye contests:

(a) In any contest targeting either bass or walleye, all live bass or walleye must be released alive into the water from which they were caught after being weighed and/or measured. At the end of each day's competition, if the mortality of target fish caught that day exceeds 10%, the contest will be suspended. Suspended contests may be continued (within assigned permit dates) only if the cause of the high mortality can be positively identified, and the cause of the mortality (high waves, equipment deficiency, etc.) ceases or is corrected by contest officials.

(b) During bass and walleye contests only, participants may continue to fish while holding up to five fish in possession, as long as one fish is released immediately upon catching a fish which would make the angler in excess of five fish

if kept. The fish released may come either from the one just caught, or from the livewell, but at no time may the angler have more than five fish in the livewell.

(c) During bass contests, contestants may not use live bait.

(d) During bass and walleye contests participants may retain up to five bass and walleye of any size to be weighed in. A tournament angler may not be in possession of more than five bass or walleye from the water being fished, except as authorized under (6)(e) below.

(e) The contest director or director designee may exceed possession limits for bass or walleye for the purpose of transporting fish from a weigh-in site to an open-water area. During transportation, the transport boat must not leave the water the fish were caught from and a copy of the contest permit must be on board during actual fish transport.

(f) Boat identification: All boats used for fishing in bass and walleye contests must be clearly identified according to criteria established by the department.

(7) Zebra mussel decontamination. Prior to participating in a Washington state fishing contest:

(a) All contest participants are required to sign a zebra mussel decontamination statement that their boats and/or boat trailers have or have not been in physical contact with any waters east of the Continental Divide for thirty days immediately preceding the contest and, if the boat and/or trailer has been in contact with such waters the participant must complete a decontamination report indicating that the following actions have been taken:

(i) A physical inspection has been made of the hull, motor, trailer, livewell and bilge by the contest director or designee, and any zebra mussels, if found, have been disposed of in a garbage container; and

(ii) The vessel has been decontaminated by the hull having been:

(A) Pressurized washed with hot soapy water; or

(B) Washed with a household bleach solution of one part bleach to 19 parts water, or the equivalent;

(iii) The motor has been run in a household bleach solution of one part bleach to 19 parts water, or the equivalent, for a minimum of one minute; and

(iv) The bilge and any livewells have been flushed, and the flush water disposed in such a manner that the wastewater will not directly enter state waters, either ground or surface.

(b) The zebra mussel decontamination statement and decontamination report shall be submitted to the department as part of the fishing contest report.

WAC 232-12-181 Livestock grazing on department of fish and wildlife lands. All persons wishing to apply for a grazing permit should contact the Washington Department of Fish and Wildlife, 600 North Capitol Way, Olympia, Washington 98501-1091.

(1) The director is authorized to enter into grazing permits when the director determines that a grazing permit will be consistent with the desired ecological condition for those lands or the department's strategic plan. Except for temporary permits, each grazing permit shall first be submitted to the commission, which may review the permit to ensure it conforms with commission policy. If, within thirty days, the

commission has not disapproved the permit, the director shall be deemed authorized to enter into that permit.

(2) The director shall advertise and sell a permit to use department lands for grazing at public auction to the highest bidder. The director is authorized to reject any and all bids if it is determined to be in the best interest of the department to do so. The director may negotiate a grazing permit without using the public auction process only when the director determines that benefits to wildlife would be equal to or greater than the cash or monetary payments foregone.

(3) The term of each grazing permit shall be no greater than five years. When an existing permit expires or is about to expire, and the director wishes to continue to permit grazing on the subject parcel, then a modified public auction process shall be used. A minimum bid based on market value shall be established prior to the public auction. The last previous or the existing permittee shall be provided the option of meeting the highest bid made at public auction. The director may grant a term longer than five years only with the prior approval of the commission. The director may permit exceptions to the public auction process only when the director determines that benefits to wildlife would be equal to or greater than the cash or monetary payment foregone.

(4) A temporary permit may be granted by the director to satisfy an immediate, short-term need where benefits to wildlife management programs and the public interest can be demonstrated. The term of a temporary permit shall not exceed two weeks and no fee need be charged.

(5) Except for temporary permits, each grazing permit proposal shall be accompanied by a domestic livestock grazing management plan that includes a description of ecological impacts, desired ecological condition, fish and wildlife benefits, a monitoring plan, and an evaluation schedule for lands that will be grazed by livestock. The director shall inspect the site of a grazing permit no less than two times each year. The director shall retain the right to alter provisions of the plan to reduce acreage available or the number of animals using the area when such change is, in the judgment of the director, required to benefit fish or wildlife management, public hunting and fishing, or other recreational uses.

(6) The director may cancel a permit (a) for noncompliance with the terms and conditions of the permit, or (b) if the area described in the permit is included in a land use plan determined by the agency to be a higher and better use, or (c) if the property is sold or conveyed, or (d) if damage to wildlife or wildlife habitat occurs.

(7) All lands covered by any grazing permit agreement shall at all times be open to public hunting, fishing and other wildlife recreational uses unless such lands have been closed by action of the commission or emergency order of the director.

WAC 232-12-243 Public safety cougar removals. (1) Definitions:

As used in this section and in the context of public safety cougar removals, the following definitions apply:

(a) "Confirmed" means qualified department staff is led to believe a cougar(s) was at the scene of the incident by interview of the complainant or observation of evidence at the scene.

(b) "Human-cougar safety incident" means aggressive or unusual behavior by a cougar which presents an actual or perceived threat to an individual.

(c) "Livestock or pet depredation" means incidents where livestock and/or pets are killed and/or injured by cougar.

(d) "Marginal cougar habitat" means those areas usually dominated by urban/suburban, developed lands with relatively high human densities.

(e) "Nuisance activity" means incidents associated with property disturbance, property damage, or livestock/pet harassment.

(f) "Preferred cougar habitat" means those areas usually dominated by rural, undeveloped lands with relatively low human densities.

(g) "Public safety need" means there exists a reasonable threat to human safety or property by one or more cougar, as indicated by the level of confirmed human-cougar safety

incidents or livestock/pet depredations, and confirmed cougar sightings or nuisance activities.

(h) "Removal" means the act of killing one or more cougar with the aid of dogs.

(i) "Sighting" means a direct observation of one or more cougar, in urban or rural settings, near individuals or residences; typically more than chance observations.

(j) "Human-cougar interaction" means a human-cougar safety incident, livestock or pet depredation, cougar nuisance activity, or cougar sighting event.

(k) "Dog hunter" means a person that owns and hunts with dogs that are capable of detecting, tracking and treeing a cougar.

(2) Public safety cougar removal authorization: The commission authorizes the director to issue public safety cougar removal permits consistent with this rule. Prior to issuing public safety cougar removal permits, the department shall use other practical alternatives to address a public safety need, including livestock or pet depredations. Other practical alternatives may include, but are not limited to, general cougar hunting seasons, general public information, educational programs, information to recreational hunters, cougar depredation/kill permits, and department capture and relocation/euthanasia of specific cougars.

(3) Public safety cougar removal criteria:

(a) The commission determines that when the above practical alternatives have been utilized within a game management unit, eleven confirmed human-cougar interactions per year, of which at least four must be confirmed human-cougar safety incidents or livestock/pet depredations, therein demonstrating that the practical alternatives have been inadequate to address the public safety need. The director then is authorized by the commission to remove one or more cougar, with the aid of dogs, in a selected area of that game management unit or nearby geographic area suitable for the use of dogs. The commission authorizes the director to remove one cougar per one hundred twenty square kilometers of complaint area in preferred cougar habitat, and one cougar per four hundred thirty square kilometers of complaint area in marginal cougar habitat.

(b) If warranted by conditions of this rule, public safety cougar removal(s) will be conducted annually between December 1st and March 15th in selected areas of game management units designated by the director to address a public safety need presented by one or more cougar, except in game management units in Chelan, Okanogan, Ferry, Stevens, and Pend Oreille counties where cougars will be removed to address public safety and protection of property with pilot cougar hunting seasons with the aid of dogs authorized under WAC 232-28-285.

(c) The department shall not target more than one hundred nine cougar during a public safety cougar removal period unless otherwise authorized by the commission.

(4) Public safety cougar removal permit issuance procedure.

(a) To participate in a public safety cougar removal, individuals must request that his/her name be placed on a list of available participants (participant list) by mailing their request to Washington Department of Fish and Wildlife, Enforcement Program - Public Safety Cougar Removal, 600 Capitol Way North, Olympia, WA 98501-1091. The request

must include the individual's name, address, phone number, and game management units being applied for. Individuals may apply for no more than four game management units. An individual's request to be placed on a participant list for a removal period must be postmarked no later than October 1, or be received at the department's Olympia office no later than 5:00 p.m. on October 1, during the year the removal period begins.

(b) To be eligible for a public safety cougar removal permit (permit), the participant must be a Washington resident dog hunter who, at the time of application for a permit, possesses a valid big game license with cougar as a species option. The permit holder must use dogs while participating in a public safety cougar removal.

(c) Individuals eligible for participation in a public safety cougar removal will be randomly selected from the participant list. The department will issue a permit to the person whose name is selected from the participant list. Individuals selected will be notified by telephone or mail. Individuals selected must contact the department's enforcement program in Olympia and accept the public safety cougar removal permit within fifteen days of being notified. Failure to contact the department will result in forfeit of the permit and the individual will be placed on the participant list for later selections. Permits may not be sold or reassigned.

(d) Permit holders and all individuals who will accompany the permit holder must complete the department's public safety cougar removal education course prior to participating in a public safety cougar removal.

(5) Public safety cougar removals: Quota system and participation in cougar removal.

(a) Public safety cougar removals will be based on a quota system, where permit holders may hunt cougar until the allotted numbers of cougar have been killed from each game management unit or March 15, whichever is first.

(b) Permit holders who harvest a cougar before January 15 may continue hunting for a second cougar with dogs. The permit holder must purchase an additional cougar transport tag to hunt and harvest one additional cougar and the permit holder will be issued a second permit. Permit holders who harvest a cougar after January 15 are not eligible to harvest a second cougar with dogs.

(c) To verify if the cougar removal season is open or closed in each game management unit, the permit holders shall notify the department's enforcement program in Olympia within twenty-four hours prior to exercising a public safety cougar removal permit.

(d) No more than four total individuals may participate per public safety cougar removal, including the permit holder(s). Only the permit holder, whose name appears on the permit, may take a cougar.

(e) Hunters killing a cougar during a public safety cougar removal must notify the department's enforcement program in Olympia within twenty-four hours after harvesting the cougar.

(f) The department reserves the right to accompany permit holders while participating in a public safety cougar removal.

(6) Public safety cougar removal general requirements.

(a) A valid big game hunting license which includes cougar as a species option is required to hunt cougar. One cougar

transport tag is included with a big game license that has cougar as a species option. A second cougar transport tag must be purchased to take a second cougar. Individuals may participate in multiple public safety cougar removals, but must purchase a cougar transport tag for each cougar removed. Purchases in excess of two cougar transport tags must be made at department offices.

(b) It is unlawful to kill or possess spotted cougar kittens or adult cougars accompanied by spotted kittens. Individuals selected for a public safety cougar removal permit may take one cougar per permit.

The raw pelt of a cougar must be sealed by an authorized department employee within seventy-two hours of the notification of kill. Any person who takes a cougar must present the cougar skull, in such a manner that teeth and biological samples can be extracted, to an authorized department employee at the time of sealing.

(e) The public safety cougar removal permit (permit) belongs to the state of Washington. The permit holder may be required to return to or turn over to the department the permit when, in the judgment of the department, the permit holder violates any conditions of the permit, violates trespass laws while acting under this permit, or violates any other criminal law or hunting regulation of the state while acting under this permit. If the permit holder is required to return to or turn over to the department the permit, the permit holder may request an appeal of that action in accordance with chapter 34.05 RCW. Appeal request shall be filed in writing and returned within twenty days of the date of action and be addressed to WDFW Legal Services Office, 600 Capitol Way North, Olympia, Washington 98501-1091.

Hamilton Buttes; thence along the divide between the North Fork of the Cispus River and the Cispus River to Elk Peak; thence continuing northeasterly along the same divide, and the divide between Johnson Creek and the Cispus River, passing through Buckhorn Camp (el. 6,240), honoring the divide between the Cowlitz and Cispus rivers, to the summit of Old Snowy Mountain; thence north along the crest of the Cascade range to Naches Peak; thence west through Chinook Pass along the divide of the Cowlitz River and the White River to the summit of Mt. Rainier.

(a) Application for a permit must be made on a form provided by the department. It must be submitted at least thirty days prior to acquisition of the wildlife or aquatic plants intended for release or planting, and must provide all information indicated.

(b) Permits will only be issued if the director determines there will be no adverse impact on the wildlife or wildlife habitat of the state.

Director approval for release or planting may be withdrawn for cause.

(d) Each permit shall require that an applicant intending to release wildlife in the state shall report immediately to the director the outbreak of any disease among the wildlife intended to be released. Before releasing any species, subspecies, or hybrid of animal not already existing in the wild in Washington, the director shall report to the commission on the planned release, stating the basis for determining that the planned release fulfills the criteria set forth herein. The director may release nonnative species, subspecies, or hybrids not previously released in Washington only if the director in his or her sole discretion has determined that:

Prewash oiled bird rehabilitation holding pens shall be constructed with knotless nylon net-bottoms with a stretched mesh size of one-half inch and shall provide 1.6 square feet of pen space per bird. Oiled bird rehabilitation holding pens shall be constructed in a manner such that no point within the pen is greater than two feet from a pen wall. Oiled bird rehabilitation holding pens shall be elevated a minimum of twelve inches above the floor surface.

(ii) Space requirements: In addition to the space required for prewash oiled bird rehabilitation holding pens, an additional 3.2 square feet of dedicated workspace shall be provided in the prewash holding area for each bird held in the prewash holding area. The floor of the prewash holding area shall be impermeable. Water shall not be allowed to accumulate on the floor.

(i) **Oiled bird rehabilitation drying pen requirements:** Oiled bird rehabilitation drying pens shall be no smaller than three feet in length by two feet in width; and a minimum of two feet high. Oiled bird rehabilitation drying pens shall be constructed with knotless nylon net-bottoms with a stretched mesh size of one-half inch and shall provide 2.7 square feet of pen space per bird. Each oiled bird rehabilitation pen shall be constructed in a manner such that no point within the pen is greater than two feet from a pen wall. Oiled bird rehabilitation drying pens shall be elevated a minimum of twelve inches above the floor surface. If prewash oiled bird rehabilitation holding pens meet the criteria for use as oiled bird rehabilitation drying pens and are used in the drying process, they must be cleaned of oil residue prior to use.

Each oiled bird rehabilitation pool shall be of dimensions such that no point within the pool is greater than eight feet from a side of the pool. In addition, each oiled bird rehabilitation pool shall have a breathable cover to prevent birds from escaping. Each oiled bird rehabilitation pool shall be constantly supplied with water sufficient to maintain a depth of four feet and an exchange rate of not less than four and one-quarter times per day. Water exiting the oiled bird rehabilitation pool shall come from the surface of the pool so that floating debris and oil are removed. Water from oiled bird rehabilitation pools may be reused within a facility if made oil free.

WAC 232-12-292 Bald eagle protection rules.

Purpose

- 1.1 The purpose of these rules is to protect the habitat and thereby maintain the population of the bald eagle so that the species is not classified as threatened, endangered or sensitive in Washington state. This can best be accomplished by promoting cooperative efforts to manage for eagle habitat needs through a process which is sensitive to the landowner goals as well. The following rules are designed to promote such cooperative management.

Authority

- 2.1 These rules are promulgated pursuant to RCW 77.12.-655.

Definitions

- 3.1 "Communal roost site" means all of the physical features surrounding trees used for night roosting that are important to the suitability of the roost for eagle use. These features include flight corridors, sources of disturbance, trees in which eagles spend the night, trees used for perching during arrival or departure and other trees or physical features, such as hills, ridges, or cliffs that provide wind protection.

- 3.2 "Cultural activities" means activities conducted to foster the growth of agricultural plants and animals.
- 3.3 "Department" means department of fish and wildlife.
- 3.4 "Endangered" means a species which is seriously threatened with extirpation throughout all or a significant portion of its range within Washington.
- 3.5 "Government entities" means all agencies of federal, state and local governments.
- 3.6 "Landowner" means any individual, private, partnership, nonprofit, municipal, corporate, city, county, or state agency or entity which exercises control over a bald eagle habitat whether such control is based on legal or equitable title, or which manages or holds in trust land in Washington state.
- 3.7 "Nest tree" means any tree that contains a bald eagle nest or has contained a nest.
- 3.8 "Nest site" means all of the physical features surrounding bald eagle nests that are important to normal breeding behavior. These features include alternate and potential nest trees, perch trees, vegetative screening, foraging area, frequently used flight paths, and sources of disturbance. This site is also referred to as the territory defended by a breeding pair of eagles.
- 3.9 "Perch tree" means a tree that is consistently used by eagles. It is often close to a nest or feeding site and is used for resting, hunting, consumption of prey, mating display and as a sentry post to defend the nest.
- 3.10 "Predicides" means chemicals used to kill or control problem wildlife.

- 3.11 "Region" means an ecological/geographic area that forms a unit with respect to eagles, e.g., Hood Canal, lower Columbia River, outer coast and south Puget Sound.
- 3.12 "Sensitive" means any wildlife species native to the state of Washington that is vulnerable or declining and is likely to become endangered or threatened in a significant portion of its range within the state without cooperative management or removal of threats.
- 3.13 "Site management plan" means a legal agreement between the department and the landowner for management of a bald eagle nest or roost site. This plan may be a list of conditions on a permit or a more detailed, site-specific plan.
- 3.14 "Threatened" means a species that could become endangered within Washington without active management or removal of threats.

Applicability and operation

- 4.1 The department shall make available to other governmental entities, interest groups, landowners and individuals information regarding the location and use pattern of eagle nests and communal roosts.
- 4.2 The department shall itself and through cooperative efforts (such as memoranda of understandings pursuant to chapter 39.34 RCW) work with other government agencies and organizations to improve the data base for nest and communal roost site activity and productivity and to protect eagle habitats through site management plans.
- 4.3 The department's goal shall be to identify, catalog and prioritize eagle nest or communal roost sites. The department shall notify permitting agencies of nesting or roost site locations.
- 4.4 When a landowner applies for a permit for a land-use activity that involves land containing or adjacent to an eagle nest or communal roost site, the permitting agency shall notify the department.

If the department determines that the proposed activity would adversely impact eagle habitat, a site management plan shall be required. The department, a permitting agency, or wildlife biologist may work with the landowner to develop a plan. The department has final approval authority on all plans.
- 4.5 It is recognized that normal on-going agricultural activities of land preparation, cultivating, planting, harvesting, other cultural activities, grazing and animal-rearing activities in existing facilities do not have significant adverse consequences for eagles and therefore do not require a site management plan. New building construction, conversion of lands from agriculture to other uses, application of pesticides and aerial pesticide spraying, may, following a conference with the department, be subject to the site management planning process described in these rules.
- 4.6 Emergency situations, such as insect infestation of crops, requires immediate action on the site management plan or special permission to address the impending crisis by the department.

Site management plan for bald eagle habitat protection

- 5.1 The purpose of the site management plan is to provide for the protection of specific bald eagle habitat in such a way as to recognize the special characteristics of the site and the landowner's property rights, goals and pertinent options. To this end, every land owner shall have fair access to the process including available incentives and benefits. Any relevant factor may be considered, including, but not limited to, the following:
 - 5.1.1 The status of the eagle population in the region.
 - 5.1.2 The useful life of the nest or communal roost trees and condition of the surrounding forest; the topography; accessibility and visibility; and existing and alternative flight paths, perch trees, snags and potential alternative nest and communal roost trees.
 - 5.1.3 Eagle behavior and historical use patterns, available food sources, and vulnerability to disturbance.
 - 5.1.4 The surrounding land-use conditions, including degree of development and human use.
 - 5.1.5 Land ownership, landowner ability to manage, and flexibility of available landowner options.
 - 5.1.6 Appropriate and acceptable incentive mechanisms such as conservation easements, transfer or purchase of development rights, leases, mutual covenants, or land trade or purchase.
 - 5.1.7 Published recommendations for eagle habitat protection of other government entities such as the U.S. Fish and Wildlife Service.
- 5.2 The site management plan may provide for
 - 5.2.1 Tailoring the timing, duration or physical extent of activities to minimize disturbance to the existing eagle habitat and, where appropriate, identifying and taking steps to encourage and create alternative eagle habitat; and
 - 5.2.2 Establishing a periodic review of the plan to monitor whether:
 - a) The plan requires amendment in response to changing eagle and landowner circumstances
 - b) The terms of the plan comply with applicable laws and regulations,
 - c) The parties to the plan are complying with its terms.
- 5.3 The site management plan may also provide for implementing landowner incentive and compensation mech-

anisms through which the existing eagle habitat can be maintained or enhanced.

Guidelines for acquisition of bald eagle habitat

- 6.1 Real property interests may be acquired and agreements entered into which could enhance protection of bald eagle habitat. These include fee simple acquisition, land trades, conservation easements, transfer or purchase of development rights, leases, and mutual covenants. Acquisition shall be dependent upon having a willing seller and a willing buyer. Whatever interest or method of protection is preferable will depend on the particular use and ownership characteristics of a site. In discussing conservation objectives with private or public landowners, the department shall explore with the landowner the variety of protection methods which may be appropriate and available.
- 6.2 The following criteria and priorities shall be considered by the department when it is contemplating acquiring an interest in a bald eagle habitat.
 - 6.2.1 Site considerations:
 - a) Relative ecological quality, as compared to similar habitats
 - b) Ecological viability—the ability of the habitat and eagle use to persist over time
 - c) Defensibility—the existence of site conditions adequate to protect the eagle habitat from unnatural encroachments
 - d) Manageability—the ability to manage the site to maintain suitable eagle habitat
 - e) Proximity to food source
 - f) Proximity to other protected eagle habitat
 - g) Proximity to department land or other public land
 - h) Eagle population density and history of eagle use in the area
 - i) The natural diversity of native species, plant communities, aquatic types, and geologic features on the site.
 - 6.2.2 Other considerations
 - a) Ownership
 - b) Degree of threat
 - c) Availability of funding
 - d) Existence of willing donor or seller and prior agency interest
 - e) Cost

In general, priority shall be given to the most threatened high quality eagle habitats with associated natural values which require the least management.

Resolution of site management plan disputes

- 7.1 The department and the landowner shall attempt to develop a mutually agreeable site management plan within 30 days of the original notice to the department.
- 7.2 Should agreement not be reached, the landowner may request an informal settlement conference with the department.
- 7.3 If the landowner chooses not to use the informal settlement conference process or if resolution is not reached, the department shall within 15 days provide a site management plan to the landowner.
- 7.4 Upon issuance of a final site management plan, the landowner may initiate a formal appeal of the department's decision. The appeal shall be conducted according to the Administrative Procedure Act, chapter 34.05 RCW and the model rules of procedure, chapter 10-08 WAC.

A request for an appeal shall be in writing and shall be received by the department during office hours within thirty days of the issuance of the final site management plan. Requests for appeal shall be mailed to Department of Fish and Wildlife, 600 Capitol Way N., Olympia, Washington 98501-1091, or hand delivered to 1111 Washington Street S.E., Wildlife Program, Fifth floor. If there is no timely request for an appeal, the site management plan shall be unappealable.

The written request for an appeal shall be plainly labeled as "request for formal appeal" and shall contain the following:

- (a) The name, address, and phone number of the person requesting the appeal;
- (b) The specific site management plan that the person contests;
- (c) The date of the issuance of the site management plan;
- (d) Specific relief requested; and
- (e) The attorney's name, address, and phone number, if the person is represented by legal counsel.

The appeal may be conducted by the director, the director's designee, or by an administrative law judge (ALJ) appointed by the office of administrative hearings. If conducted by an ALJ, the ALJ shall issue an initial order pursuant to RCW 34.05.461. The director or the director's designee shall review the initial order and enter a final order as provided by RCW 34.05.464.

Penalties

- 8.1 Failure of a landowner to comply with the processes set forth in these rules or with the provisions of a site management plan approved by the department constitutes a misdemeanor as set forth in RCW 77.15.130.

[Statutory Authority: RCW 77.12.047, 77.12.655, 77.12.020. 02-02-062 (Order 01-283), § 232-12-292, filed 12/28/01, effective 1/28/02. Statutory Authority: RCW 77.12.655. 86-21-010 (Order 283), § 232-12-292, filed 10/3/86.]

WAC 232-12-297 Endangered, threatened, and sensitive wildlife species classification.

Purpose

- 1.1 The purpose of this rule is to identify and classify native wildlife species that have need of protection and/or management to ensure their survival as free-ranging populations in Washington and to define the process by which listing, management, recovery, and delisting of a species can be achieved. These rules are established to ensure that consistent procedures and criteria are followed when classifying wildlife as endangered, or the protected wildlife subcategories threatened or sensitive.

Definitions

For purposes of this rule, the following definitions apply:

- 2.1 "Classify" and all derivatives means to list or delist wildlife species to or from endangered, or to or from the protected wildlife subcategories threatened or sensitive.
- 2.2 "List" and all derivatives means to change the classification status of a wildlife species to endangered, threatened, or sensitive.
- 2.3 "Delist" and its derivatives means to change the classification of endangered, threatened, or sensitive species to a classification other than endangered, threatened, or sensitive.
- 2.4 "Endangered" means any wildlife species native to the state of Washington that is seriously threatened with extinction throughout all or a significant portion of its range within the state.
- 2.5 "Threatened" means any wildlife species native to the state of Washington that is likely to become an endangered species within the foreseeable future throughout a significant portion of its range within the state without cooperative management or removal of threats.
- 2.6 "Sensitive" means any wildlife species native to the state of Washington that is vulnerable or declining and is likely to become endangered or threatened in a significant portion of its range within the state without cooperative management or removal of threats.
- 2.7 "Species" means any group of animals classified as a species or subspecies as commonly accepted by the scientific community.
- 2.8 "Native" means any wildlife species naturally occurring in Washington for purposes of breeding, resting, or foraging, excluding introduced species not found historically in this state.
- 2.9 "Significant portion of its range" means that portion of a species' range likely to be essential to the long term survival of the population in Washington.

Listing criteria

- 3.1 The commission shall list a wildlife species as endangered, threatened, or sensitive solely on the basis of

the biological status of the species being considered, based on the preponderance of scientific data available, except as noted in section 3.4.

- 3.2 If a species is listed as endangered or threatened under the federal Endangered Species Act, the agency will recommend to the commission that it be listed as endangered or threatened as specified in section 9.1. If listed, the agency will proceed with development of a recovery plan pursuant to section 11.1.
- 3.3 Species may be listed as endangered, threatened, or sensitive only when populations are in danger of failing, declining, or are vulnerable, due to factors including but not restricted to limited numbers, disease, predation, exploitation, or habitat loss or change, pursuant to section 7.1.
- 3.4 Where a species of the class Insecta, based on substantial evidence, is determined to present an unreasonable risk to public health, the commission may make the determination that the species need not be listed as endangered, threatened, or sensitive.

Delisting criteria

- 4.1 The commission shall delist a wildlife species from endangered, threatened, or sensitive solely on the basis of the biological status of the species being considered, based on the preponderance of scientific data available.
- 4.2 A species may be delisted from endangered, threatened, or sensitive only when populations are no longer in danger of failing, declining, are no longer vulnerable, pursuant to section 3.3, or meet recovery plan goals, and when it no longer meets the definitions in sections 2.4, 2.5, or 2.6.

Initiation of listing process

- 5.1 Any one of the following events may initiate the listing process.
 - 5.1.1 The agency determines that a species population may be in danger of failing, declining, or vulnerable, pursuant to section 3.3.
 - 5.1.2 A petition is received at the agency from an interested person. The petition should be addressed to the director. It should set forth specific evidence and scientific data which shows that the species may be failing, declining, or vulnerable, pursuant to section 3.3. Within 60 days, the agency shall either deny the petition, stating the reasons, or initiate the classification process.
 - 5.1.3 An emergency, as defined by the Administrative Procedure Act, chapter 34.05 RCW. The listing of any species previously classified under emergency rule shall be governed by the provisions of this section.
 - 5.1.4 The commission requests the agency review a species of concern.
- 5.2 Upon initiation of the listing process the agency shall publish a public notice in the Washington Register,

and notify those parties who have expressed their interest to the department, announcing the initiation of the classification process and calling for scientific information relevant to the species status report under consideration pursuant to section 7.1.

Initiation of delisting process

- 6.1 Any one of the following events may initiate the delisting process:
- 6.1.1 The agency determines that a species population may no longer be in danger of failing, declining, or vulnerable, pursuant to section 3.3.
 - 6.1.2 The agency receives a petition from an interested person. The petition should be addressed to the director. It should set forth specific evidence and scientific data which shows that the species may no longer be failing, declining, or vulnerable, pursuant to section 3.3. Within 60 days, the agency shall either deny the petition, stating the reasons, or initiate the delisting process.
 - 6.1.3 The commission requests the agency review a species of concern.
- 6.2 Upon initiation of the delisting process the agency shall publish a public notice in the Washington Register, and notify those parties who have expressed their interest to the department, announcing the initiation of the delisting process and calling for scientific information relevant to the species status report under consideration pursuant to section 7.1.

Species status review and agency recommendations

- 7.1 Except in an emergency under 5.1.3 above, prior to making a classification recommendation to the commission, the agency shall prepare a preliminary species status report. The report will include a review of information relevant to the species' status in Washington and address factors affecting its status, including those given under section 3.3. The status report shall be reviewed by the public and scientific community. The status report will include, but not be limited to an analysis of:
- 7.1.1 Historic, current, and future species population trends
 - 7.1.2 Natural history, including ecological relationships (e.g. food habits, home range, habitat selection patterns).
 - 7.1.3 Historic and current habitat trends.
 - 7.1.4 Population demographics (e.g. survival and mortality rates, reproductive success) and their relationship to long term sustainability.
 - 7.1.5 Historic and current species management activities.
- 7.2 Except in an emergency under 5.1.3 above, the agency shall prepare recommendations for species classification, based upon scientific data contained in the status report. Documents shall be prepared to

determine the environmental consequences of adopting the recommendations pursuant to requirements of the State Environmental Policy Act (SEPA).

- 7.3 For the purpose of delisting, the status report will include a review of recovery plan goals.

Public review

- 8.1 Except in an emergency under 5.1.3 above, prior to making a recommendation to the commission, the agency shall provide an opportunity for interested parties to submit new scientific data relevant to the status report, classification recommendation, and any SEPA findings.
- 8.1.1 The agency shall allow at least 90 days for public comment.

Final recommendations and commission action

- 9.1 After the close of the public comment period, the agency shall complete a final status report and classification recommendation. SEPA documents will be prepared, as necessary, for the final agency recommendation for classification. The classification recommendation will be presented to the commission for action. The final species status report, agency classification recommendation, and SEPA documents will be made available to the public at least 30 days prior to the commission meeting.
- 9.2 Notice of the proposed commission action will be published at least 30 days prior to the commission meeting.

Periodic species status review

- 10.1 The agency shall conduct a review of each endangered, threatened, or sensitive wildlife species at least every five years after the date of its listing. This review shall include an update of the species status report to determine whether the status of the species warrants its current listing status or deserves reclassification.
- 10.1.1 The agency shall notify any parties who have expressed their interest to the department of the periodic status review. This notice shall occur at least one year prior to end of the five year period required by section 10.1.
- 10.2 The status of all delisted species shall be reviewed at least once, five years following the date of delisting.
- 10.3 The department shall evaluate the necessity of changing the classification of the species being reviewed. The agency shall report its findings to the commission at a commission meeting. The agency shall notify the public of its findings at least 30 days prior to presenting the findings to the commission.
- 10.3.1 If the agency determines that new information suggests that classification of a species should be changed from its present state, the agency shall initiate classification pro-

cedures provided for in these rules starting with section 5.1.

- 10.3.2 If the agency determines that conditions have not changed significantly and that the classification of the species should remain unchanged, the agency shall recommend to the commission that the species being reviewed shall retain its present classification status.

- 10.4 Nothing in these rules shall be construed to automatically delist a species without formal commission action.

Recovery and management of listed species

- 11.1 The agency shall write a recovery plan for species listed as endangered or threatened. The agency will write a management plan for species listed as sensitive. Recovery and management plans shall address the listing criteria described in sections 3.1 and 3.3, and shall include, but are not limited to:

- 11.1.1 Target population objectives
- 11.1.2 Criteria for reclassification
- 11.1.3 An implementation plan for reaching population objectives which will promote cooperative management and be sensitive to landowner needs and property rights. The plan will specify resources needed from and impacts to the department, other agencies (including federal, state, and local), tribes, landowners, and other interest groups. The plan shall consider various approaches to meeting recovery objectives including, but not limited to regulation, mitigation, acquisition, incentive, and compensation mechanisms.
- 11.1.4 Public education needs
- 11.1.5 A species monitoring plan, which requires periodic review to allow the incorporation of new information into the status report.

- 11.2 Preparation of recovery and management plans will be initiated by the agency within one year after the date of listing.

- 11.2.1 Recovery and management plans for species listed prior to 1990 or during the five years following the adoption of these rules shall be completed within 5 years after the date of listing or adoption of these rules, whichever comes later. Development of recovery plans for endangered species will receive higher priority than threatened or sensitive species.
- 11.2.2 Recovery and management plans for species listed after five years following the adoption of these rules shall be completed within three years after the date of listing.
- 11.2.3 The agency will publish a notice in the Washington Register and notify any parties who have expressed interest to the department interested parties of the initiation of recovery plan development.

- 11.2.4 If the deadlines defined in sections 11.2.1 and 11.2.2 are not met the department shall notify the public and report the reasons for missing the deadline and the strategy for completing the plan at a commission meeting. The intent of this section is to recognize current department personnel resources are limiting and that development of recovery plans for some of the species may require significant involvement by interests outside of the department, and therefore take longer to complete.

- 11.3 The agency shall provide an opportunity for interested public to comment on the recovery plan and any SEPA documents.

Classification procedures review

- 12.1 The agency and an ad hoc public group with members representing a broad spectrum of interests, shall meet as needed to accomplish the following:

- 12.1.1 Monitor the progress of the development of recovery and management plans and status reviews, highlight problems, and make recommendations to the department and other interested parties to improve the effectiveness of these processes.
- 12.1.2 Review these classification procedures six years after the adoption of these rules and report its findings to the commission.

Authority

- 13.1 The commission has the authority to classify wildlife as endangered under RCW 77.12.020. Species classified as endangered are listed under WAC 232-12-014, as amended.
- 13.2 Threatened and sensitive species shall be classified as subcategories of protected wildlife. The commission has the authority to classify wildlife as protected under RCW 77.12.020. Species classified as protected are listed under WAC 232-12-011, as amended.

WAC 232-12-807 Operations and procedures. The department of game is a public service agency whose statutory responsibility is to preserve, protect, and perpetuate all

(2007 Ed.)

forms of wildlife in the state of Washington and to serve the public by providing the maximum amount of wildlife-oriented recreation consistent with sound biological management.

The state game commission consists of six members appointed by the governor. They serve a term of six years each. Terms are arranged so that appointments of two members expire every two years. By law, three commissioners are appointed from eastern Washington and three from western Washington. The game commission establishes regulations, sets overall policies to guide the department, and appoints the director of game. The director is responsible for all activities of the department of game and reports directly to the game commission.

Organization of the department of game is one of decentralized management. A deputy director and two assistant directors aid in the operation and administration of the department. The Olympia staff consists of seven division administrators who head up areas of program planning and coordination. Completing the staff is a planning section and a special assistant to the director for federal affairs.

The fisheries management division is responsible for research, program development, planning and coordination of management for all fish classified as game fish.

The wildlife management division is responsible for research, planning, program development, and coordination of management for all wildlife in the state other than fish. Major activities of this division relate to big game species, a variety of small game including birds, nonhunted wildlife, and management of wildlife areas.

The habitat management division is responsible for research, planning, program development and coordination for protection, restoration, and enhancement of wildlife and fish habitat areas through the use of environmental laws and public education. A major portion of this program is related to cooperative contractual agreements with other land managers and private landholders.

The enforcement division is responsible for planning, program development, and coordination of enforcement and wildlife control activities.

The engineering and lands division is responsible for engineering and design, construction, maintenance, surveying, land acquisition, and property management services. The division also prepares and implements the department's capital budget.

The management services division has responsibility for the budget development, accounting, federal aid coordination, payroll, printing, mailing, purchasing, vendor payments, warehouse services, safety, maintenance of archives, department's license management, and data processing.

The information and education division is responsible for planning and program development of the hunter education and safety training, project WILD for school children, various publications, trapper training, interpretive displays, newsletters, news releases, and radio and television public service announcements.

The department of game has six administrative regions in the state; three on the eastside, three on the westside. Each region is administered by a regional supervisor who is responsible for all department programs within his assigned region. They are assisted by program managers for the key

areas of enforcement, habitat, wildlife, and fisheries. Program implementation is carried out primarily by field agents and biological or production staff.

The game commission, through the public meeting process, establishes all rules and regulations that govern departmental activities. This includes establishment of hunting and fishing seasons; approval of land acquisitions or exchanges; coordination with other federal, state, county, or city programs; and adjudication of requests for license reinstatements when individual privileges have been revoked in accordance with RCW's.

The game commission holds four statutory meetings each year in January, April, July, and October, and other special meetings as necessary to conduct its business.

Eastern Washington - all lands lying east of the Cascade Crest Trail and east of the Big White Salmon River in Klickitat County.

Western Washington - all lands lying west of the Cascade Crest Trail and west of and including the Big White Salmon River in Klickitat County.

WAC 232-12-810 Public records officer. The department public records are in charge of a public records officer designated by the director. The person so designated is located in the Administrative Office of the Department, 600 No. Capitol Way, Olympia, Washington. The public records officer is responsible for the following: The implementation of the department's rules and regulations regarding release of public records, regarding the administration or enforcement of chapter 1, Laws of 1973 and these rules, coordinating the staff of the department in this regard, and generally insuring compliance by the staff with the public records and disclosure requirements of chapter 1, Laws of 1973.

WAC 232-12-814 Requests for public records. In accordance with requirements of chapter 1, Laws of 1973 that agencies prevent unreasonable invasions of privacy, protect public records from damage or disorganization, and prevent excessive interference with essential functions of the agency, public records may be inspected or copied or copies of such records may be obtained, by members of the public, upon compliance with the following procedures:

(1) A request shall be made in writing addressed to attention of the department of game public records officer. The request shall include the following information:

- (a) The name of the person requesting the record[;]
- (b) The calendar date on which the request was made;
- (c) The nature of the request; and an appropriate description of the record requested.

(2) In all cases in which a member of the public is making a request, it is the obligation of the public records officer or staff member to whom [a] request is made to assist the member of the public in appropriately identifying the public record requested.

(3) No public record shall be allowed to be removed from a department office by anyone other than an officially authorized person.

[Statutory Authority: RCW 77.12.040, 81-22-002 (Order 174), § 232-12-814, filed 10/22/81; Order 42, § 232-12-814, filed 7/19/73.]

WAC 232-12-820 Review of denials of public records requests. (1) A person who objects to the denial of a request for a public record may petition for prompt review of such decision by tendering a written request for review. The written request shall specifically refer to the written statement by the public records officer or other staff member which constituted or accompanied the denial.

(2) Upon receiving a written request for review of a decision denying a public record, the public records officer or other staff member denying the request shall immediately refer it to the director. The director shall consider the matter and within two business days either affirm or reverse such denial.

WAC 232-12-824 Records index. The department of game, pursuant to RCW 42.17.260(3) amended at [by] chapter 294, Laws of 1975 1st ex. sess., hereby formally declares that to fully maintain the RCW 42.17.260(2) proscribed [prescribed] current index would unduly burden the agency's operations. No central or routing file currently exists.

The agency does fully maintain an index describing administrative staff manuals and instructions to staff which affect a member of the public. The index includes:

- (1) Statements of policy and interpretations of policy which have been adopted by the agency
- (2) Planning policies and goals and interim and final decisions
- (3) Factual staff reports and studies, factual consultant reports and studies, scientific reports and studies, and other factual information derived from test studies, reports and surveys

WAC 232-12-828 Hunting of game birds and animals by persons with a disability. (1) Definitions:

(a) "Hunter with a disability" means a person with a permanent disability who possesses a disabled hunter permit issued by the department. A hunter with a disability must have all required licenses, tags, permits, and stamps before hunting.

(b) "Disabled hunter permit" means a permit, card, or endorsement to a license issued by the department to any person with a permanent disability who applies to the department and presents such evidence as the director may require showing that the applicant is a person with a qualifying disability. Upon approval of the application, the department will issue a vehicle identification placard. A designated hunter companion card will be issued with a hunting license.

(c) "Designated hunter companion" means a person who assists a hunter with a disability in the stalking, shooting, tracking, retrieving, or tagging of game birds and game animals.

(d) "Designated hunter companion card" means an identification card issued by the department to the hunter with a disability.

(e) "Blind or visually impaired" means a central visual acuity that does not exceed 20/200 in the better eye with corrective lenses, or the widest diameter of the visual field does not exceed twenty degrees.

(f) "Accompany" means the hunter with a disability and the designated hunter companion are in the physical presence of each other, not to exceed 1/4 mile separation. While stalking or shooting an animal, the hunter with a disability and the designated hunter companion must have a form of reliable and direct communication.

(g) "Special use permit" means a permit issued by the department to a person with a specific permanent disability as a reasonable accommodation. The special use permit allows for a specific act or acts to include, but not be limited to, use of adaptive mechanical, electrical, or specialty equipment or devices that aid the person in hunting.

(h) "Person with a disability" means:

(i) A person who has a permanent disability and is not ambulatory over natural terrain without a lower extremity prosthesis or must permanently use a medically prescribed assistive device for mobility, including, but not limited to, a wheelchair, crutch, cane, walker, or oxygen bottle; or

(ii) A person who has a permanent disability and is physically incapable of holding and safely operating a firearm or other legal hunting device.

This definition includes, but is not limited to, persons with a permanent upper or lower extremity impairment who have lost the use of one or both upper or lower extremities, or who have a severe limitation in the use of one or both upper or lower extremities, or who have a diagnosed permanent disease or disorder which substantially impairs or severely interferes with mobility or the use of one or both upper or lower

(2007 Ed.)

extremities for holding and safely operating a firearm or other legal hunting device; or

(iii) A person who is blind or visually impaired.

"Visually impaired" means central visual acuity that does not exceed 20/200 in the better eye with corrective lenses, or the widest diameter of the visual field is no greater than twenty degrees.

(2) The designated hunter companion must accompany the hunter with a disability when stalking or shooting game on behalf of the hunter with a disability. The hunter with a disability or the designated hunter companion must immediately cut, notch, or date any required tag. The tag must be affixed to the carcass of the game bird or animal as soon as is reasonably possible after killing the game.

(3) The designated hunter companion does not need to accompany the hunter with a disability while tracking an animal wounded by either hunter, or while tagging or retrieving a downed animal on behalf of the hunter with a disability.

(4) It is unlawful for a designated hunter companion to assist a hunter with a disability unless the designated hunter companion has the designated hunter companion identification card on his or her person.

(5) It is unlawful for a hunter with a disability to shoot from a motor vehicle, nonhighway vehicle or snowmobile unless the vehicle is stopped, the motor is turned off and the vehicle is not on or beside the maintained portion of a public highway. A disabled hunter vehicle identification placard must be displayed.

(6) It is unlawful for any person to possess a loaded firearm in a moving vehicle or to shoot a firearm, crossbow, or bow and arrow from, across, or along the maintained portion of a public highway.

(7) Game birds or game animals killed, tagged or retrieved by a designated hunter companion on behalf of a hunter with a disability do not count against the designated hunter companion's bag or possession limit.

(8) A designated hunter companion shooting game for or may be shooting game for a hunter with a disability must have a valid hunting license issued by Washington or another state.

WAC 232-28-285 2006-2007 Pilot cougar hunting seasons with the aid of dogs. As used in this section and in the context of pilot cougar hunting seasons, the following definitions apply:

"Accompany" means the dog handler and permit hunter must be in the physical presence of each other at the time dogs are released from a leash or unrestrained or starting a cougar track.

"Pursue" or "pursuit" means dogs are:

- Not on a leash or restrained; or
- Starting a cougar track; or
- In the act of tracking a cougar; or
- At a treed cougar.

Transporting dogs in a motorized vehicle or walking a dog on a leash is not pursuit.

"Dog owner" means a person that owns and hunts with dogs that are capable of detecting, tracking and treeing a cougar.

"Quota" means the targeted harvest goal. The actual harvest level may exceed the quota.

"Kill permit" allows a hunter to pursue or kill cougar.

"Pursuit permit" allows a hunter to pursue cougar.

(1) The pilot cougar-hunting season will allow use of dogs to hunt cougar. The hunts will consist of pursuit-or-kill seasons and pursuit-only seasons, and are allowed only in Chelan, Okanogan, Ferry, Stevens, and Pend Oreille counties.

(2) Pursuit-or-kill seasons:

Cougar may be pursued or killed with the aid of dogs from December 1, 2006, until the female zone quota has been killed, the total zone quota has been killed, or March 31, 2007, whichever occurs first; EXCEPT GMUs 101 and 204 where cougar may be pursued or killed from January 1, 2007, until the female zone quota has been killed, the total zone quota has been killed, or March 31, 2007, whichever occurs first.

(3) Pursuit-only seasons:

(a) If a zone quota is killed prior to March 31, 2007, cougar may be pursued with dogs in all or portions of that zone until March 31, 2007. Hunters may only pursue cougars in designated pursuit only areas identified on their kill or pursuit-only permit. Hunters may not kill cougar during pursuit-only seasons.

(b) Hunters selected for the pursuit-or-kill season (accompanied by up to three of their identified handlers) may participate in a pursuit-only season. Permit hunters that har-

vest a cougar under a kill permit may continue to pursue cougars until March 31. If a zone quota is killed, the department will also issue pursuit-only permit to hunters drawn at random from the unselected pool of applicants. The director will identify the number of pursuit-only hunters selected.

(4) Hunt areas and kill quotas:

Cougar seasons will be based on a quota system, where permit hunters using dogs may hunt and kill cougar until the allotted numbers of cougar have been killed from each hunt zone or March 31, 2007, whichever occurs first.

CMU	Hunt Choice	Hunt Zone	Area Description	QUOTA	
				Total	Female

	9002	Chelan	Those portions of GMUs 243, 244, 245, 246, 247, 249, 250, and 251 within Chelan County	10	4

	9004	Stevens-Pend Oreille	Those portions of GMUs 105, 108, 111, 113, 117, 121 within Stevens and Pend Oreille counties	38	15

(5) Quota hotline:

Permit hunters participating in a pursuit-or-kill season must call the toll free cougar quota hotline within twenty-four hours prior to each day hunting cougar to determine if the zone quota has been killed and the zone is closed. Hunters who hunt more than one consecutive day must call the quota hotline once daily to determine if the zone quota is killed. Hunters who harvest a cougar with the aid of dogs must notify the department within twenty-four hours of kill (excluding legal state holidays) and provide the hunter's name, date and location of kill, and sex of animal. The raw pelt of a cougar, with proof of sex naturally attached, must be sealed by an authorized department employee within five days of the notification of kill. Any person who takes a cougar must present the cougar skull in such a manner that teeth and biological samples can be extracted to an authorized department employee at the time of sealing.

(6) Kill or pursuit-only permit eligibility:

(a) To apply for a kill or pursuit-only permit under this section, individuals must sign an affidavit provided by the department, certifying under penalty of false swearing under RCW 9A.72.040 that they are a dog owner. (a) Kill quotas start September 1 and will include all cougar killed during seasons with and without the aid of dogs, including cougar seasons under this section, cougar seasons without the aid of dogs authorized under WAC 232-28-272, depredation permits, landowner kill permits, and WDFW depredation authority.

(b) Individual problem cougar will continue to be killed on an as-needed basis utilizing depredation permits, landowner kill permits, and WDFW depredation authority even if these kills result in exceeding a zone quota.

Any person issued a permit and who is subsequently convicted of any wildlife offense while participating in a pursuit-or-kill or pursuit-only season, or who violates any condition of the permit, will have the permit revoked and will be ineligible to participate in the remainder of the three-year pilot program.

(7) Permit issuance procedure:

(a) The number of kill permits for a pursuit-or-kill season with the aid of dogs may be established by the director, but will not exceed two times the total cougar quota for each hunt zone.

(b) The department will issue kill or pursuit-only permits to the persons whose applications are drawn at random. Individuals selected will be notified by telephone or mail. Individuals selected must return the signed affidavit to the department's wildlife program in Olympia within fifteen days of being notified. Dog handlers may not pursue cougar when the permit hunter is not present at the time the dogs are released from a leash or unrestrained. Not all successful applicants will be contacted in any given year depending on elk damage activity for that year.

Hunter Education Instructor Incentive Permits				
<ul style="list-style-type: none"> Special elk permits will be allocated through a random drawing to those hunter education instructors that qualify. Permit hunters must use archery equipment during archery seasons, muzzleloader equipment during muzzleloader seasons, and any legal weapon during modern firearm seasons. Qualifying hunter education instructors must be certified and have been in active status for a minimum of three consecutive years, inclusive of the year prior to the permit drawing. Instructors who are drawn, accept a permit, and are able to participate in the hunt, will not be eligible for these incentive permits for a period of ten years thereafter. Permittees may purchase a second license for use with the permit hunt only.

Successful applicants must check in with the WDFW hunt coordinator at least 24 hours prior to hunting and all hunters must hunt over decoys. Special authorizations are not valid for commercial uses. Authorizations are valid for one week (only on Monday, Wednesday and Saturday) and only on private lands specified by the WDFW hunt coordinator. Hunters will be assigned at random to private farms participating in the program.

Bag limits for Goose Management Areas 2A and 2B:

Daily bag limit: 4 geese, to include not more than 1 dusky Canada goose, 1 Aleutian goose, and 2 cackling geese.

Possession limit: 8 geese, to include not more than 1 dusky Canada goose, 2 Aleutian geese, and 4 cackling geese.

Season limit: 1 dusky Canada goose.

A dusky Canada goose is defined as a dark-breasted (as shown in the Munsell color chart 10 YR, 5 or less) Canada goose with a culmen (bill) length of 40-50 mm. A cackling goose is defined as a goose with a culmen (bill) length of 32 mm or less.

Special Provisions for Goose Management Areas 2A and 2B:

The Canada goose season for Goose Management Areas 2A and 2B will be closed early if dusky Canada goose harvests exceed area quotas which collectively total 80 geese. The fish and wildlife commission has authorized the director to implement emergency area closures in accordance with the following quotas: A total of 80 dusks, to be distributed 15 for Zone 1 (Ridgefield NWR); 25 for Zone 2 (Cowlitz County south of the Kalama River); 20 for Zone 3 (Clark County except Ridgefield NWR); 10 for Zone 4 (Cowlitz County north of the Kalama River and Wahkiakum County); and 10 for Zone 5 (Pacific County). Quotas may be shifted to other zones during the season to optimize use of the statewide quota and minimize depredation.

Hunting is only permitted by written authorization from the Washington department of fish and wildlife. Hunters who maintained a valid 2005-06 written authorization will be mailed a 2006-07 authorization card prior to the 2006-07 season. New hunters and those who did not maintain a valid 2005-06 authorization must review goose identification training materials and score a minimum of 80% on a goose identification test to receive written authorization. Hunters who fail a test must wait 28 days before retesting, and will not be issued a reciprocal authorization until that time. Information on training materials and testing dates/locations is available at the Olympia and regional offices.

With written authorization, hunters will receive a harvest report. Hunters must carry the authorization card and harvest report while hunting. Immediately after taking a Canada goose (dusky, lesser/Taverner, cackling, or other subspecies) into possession, hunters must record in ink the information required on the harvest report. Hunters must go directly to the nearest check station and have geese tagged when leaving a hunt site, before 6:00 p.m. If a hunter takes the season bag limit of one dusky Canada goose or does not comply with requirements listed above regarding checking of birds and recording harvest on the harvest report, written authorization will be invalidated and the hunter will not be able to hunt Canada geese in Goose Management Areas 2A and 2B for the remainder of the season and the special late Canada goose season. It is unlawful to fail to comply with all provisions listed above for Goose Management Areas 2A and 2B.

Special Late Canada Goose Season for Goose Management Area 2A:

Open to Washington department of fish and wildlife advanced hunter education (AHE) program graduates and youth hunters (15 years of age or under, who are accompanied by an AHE hunter) possessing a valid 2006-07 southwest Washington Canada goose hunting authorization, in areas with goose damage in Goose Management Area 2A on the following days, from 7:00 a.m. to 4:00 p.m.:

Saturdays and Wednesdays only, Feb. 3 - Mar. 10, 2007.

Daily bag limit: 4 Canada geese, to include not more than 1 dusky Canada goose, 1 Aleutian goose, and 2 cackling geese. Possession limit: 8 Canada geese, to include not more than 1 dusky Canada goose, 1 Aleutian goose, and 4 cackling geese. Season limit: 1 dusky Canada goose.

A dusky Canada goose is defined as a dark-breasted Canada goose (as shown in the Munsell color chart 10 YR, 5 or less) with a culmen (bill) length of 40-50 mm. A cackling goose is defined as a goose with a culmen (bill) length of 32 mm or less.

Hunters qualifying for the season will be placed on a list for participation in this hunt. Washington department of fish and wildlife will assist landowners with contacting qualified hunters to participate in damage control hunts on specific lands incurring goose damage. Participation in this hunt will depend on the level of damage experienced by landowners. The special late Canada goose season will be closed by emergency action if the harvest of dusky Canada geese exceeds 85 for the regular and late seasons. All provisions listed above for Goose Management Area 2A regarding written authorization, harvest reporting, and checking requirements also apply to the special late season; except hunters must confirm their participation at least 24 hours in advance by calling the goose hunting hotline (listed on hunting authorization), and hunters must check out by 5:00 p.m. on each hunt day regardless of success.
